POWX0361

JIGSAW 810W

You can saw accurately tight curves and wavy lines using this Powerplus jigsaw with 4 pendulum positions and adjustable aluminium base. The POWX0361 has a rated power of 810W and reaches up to 3000 rotations per minute. Its maximum cutting depth in steel equals 8mm and 80mm in wood and plastic.

This saw is designed with a side guide system and high precision laser for precise and straight cuts. The 3m long cable and led light add even more precision, as they enable you to work in hard to reach or even dark places.

You can choose between 4 blades for wood and 2 blades for metal. You can use saw blades with T- as well as U-shaped connection for this jigsaw. They can be inverted easily thanks to the quick blade change system. You don't lose time neither by pushing buttons, because the lock-on button keeps you working without any interruption.

Finally you don't have to worry about a dirty or unhealthy working environment. The dust extraction adaptor permits connection to a vacuum cleaner for a clear and clean view of the cutting line and a dust-free atmosphere.
