STRONG ADJUSTABLE ALUMINIUM BASE

## JIGSAW 710W

This powerful jigsaw is ideally suited for cutting curved shapes precisely, even in the middle of a workpiece. The base plate can be tilted 45° to the left and the right, which makes bevel cuts possible as well.

The tool features a 710W motor and has a sawing capacity of 10mm in steel and 20mm in plastic. In wood, the saw can make cuts with a depth of up to 74mm for 45° bevel cuts and 100mm for regular cuts. Its 4-stage pendulum action and electric speed control settings between 1000 and 3100min-1 allow for the perfect setting for every task at hand.

The parallel guide provides the necessary precision. Thanks to the dust extraction adaptor, the cutting line stays visible throughout. With the quick blade change system, saw blades can be switched easily. For working uninterrupted, the saw has been equipped with a lock-on button. The jigsaw comes with one saw blade for wood and one for metals.

# POWERPLUS

*Pro Power is especially designed to meet the demands of a professional. The superior quality tools deliver a high performance and can handle the most challenging tasks. With Pro Power you can be sure of extremely durable and reliable tools.*
