POWX720

SELF-LEVELING LASER LEVEL

With this self-adjusting laser level you can project highly visible horizontal or vertical lines on surfaces or objects. Or you can combine both horizontal and vertical beams to form a cross. The POWX720 levels the laser beam automatically in only seven seconds.

The laser includes a marked 360° rotating base, so you can make accurate measurements over a wide area. The self-adjusting laser level can be used on its own, but can also be attached to the wall or put on the included tripod. The laser level even has a beeping alarm function to warn you for out of leveling angle (+6°), so you can easily adjust the tripod or bracket height. A locking switch protects the inner pendulum from damage when travelling or when not using the laser level.

The POWX720 is delivered in a BMC case and comes with a tripod, wall bracket and two 1,5V AA batteries.

TECHNICAL SPECIFICATIONS POWX720		Features	Box content	Symbols
Wavelength of laser	650nm	<ul style="list-style-type: none"> • self-leveling to 6° in 7 sec • beeping sound when out of range • adjustable tripod • 360° rotating base • 3 function line: horizontal, vertical and intersecting beams 	1x self-leveling laser level	
Power supply	2x AA battery 1.5V		1x tripod	
Tripod height	475-1240mm		1x wall bracket	
Laser class	II		1x 360° rotating base	
Operative distance	≤ 10m		2x 1.5V AA batteries	
Self-leveling scope	≤ 6sec		1x manual	
Self-leveling speed	≤ 7sec		1x BMC	
Spread angle	≤ 90°
