2-IN-1 CULTIVATOR 208cc - POWXG7217

This 2-IN-1 cultivator with eco driver turbo engine can easily be converted in a plough. An initial ploughing is necessary when you want to cut deep into firm ground. It will turn over the upper layer of the soil, bring fresh nutrients to the surface and bury thick surface plant growth underneath where it will compose. The POWXQ7217 has traction on both wheels and guarantees an easy handling while ploughing.

When you replace the wheels by the 6 reinforced steel knives, you can start to break up and cultivate the ploughed ground. You can quickly and efficiently aerate the soil, get rid off the last weeds and dig in fertilisers or compost. The POWXG7217 is easy to manoeuvre and is equipped with forward and reverse drive. The handlebar can be used in different positions and gives you extra comfort.
